

Skip the Line, But Don't Skip the Match!

Jagger

- 22 years old
- Earns **\$50,000** per year
- Loves to shop

His employer matches

50% up to **6%**

of Jagger's contributions

Jagger only contributes **2%** so he can shop more.

This earns him an additional

\$83.33

per month in company match.

By not maximizing the company match,

Jagger will leave **\$1,000**

on the table in one year.

By the time Jagger reaches retirement age, he will have left more than

\$43,000

on the table.

If Jagger put the extra \$1,000 towards his retirement, assuming an average return of 10% per year, (from 22 to 65) the \$1,000 per year would grow to

\$592,400

On average, employees leave

\$1,336

in matching funds on the table each year.¹
Don't make the same mistake!
